THEMES 2011 PRINT	Dates	For advertisements about:	Specials
JANUARY 'InfoTechnique Trendwatch' Special issue with trends in engineering, production, maintenance, energy & environment in collaboration with Engineeringnet.be&.nl, Maintenance Magazine and Pumps & Process Mag. (circ. 11,000)	Deadline 03/01/2011 Post: 24/01/2011	Engineering, production technologies, manufacturing, process equipment, machine building, maintenance, pumps & valves, RFID, logistics engineering, filters	
MARCH Engineering & Design (CAx-technologies) +Communication in and between installations & machines	Deadline 23/02/2011 Post: 16/03/2011	cadcam, cae, engineering, simulation, 3D, technical software, mechanical & electrical design + fieldbuses, networks, DCS, interfaces, controllers, ...	+ Thematic Supplement: Energy & Engineering Special attention for Fair: Industrie & Milieu 2011 in Antwerp
MAY Special Fair: Indumation 2010 Engineering & Contracting (plants & buildings) + Factory Automation + Process Automation	Deadline 12/04/2011 Post: 03/05/2011	control & measurement, fieldbus & network technology, process & factory automation, DCS, machine building, scada, plc, hmi, PLC, motion control, industrial pc's, Ethernet...	+ Thematic Supplement: Energy & Engineering
JUNE Engineering & Career (HR, jobs,...) + Special: 'Co-operating with process engineering companies and system builders/integrators	Deadline 23/05/2011 Post: 13/06/2011	mechanical engineering, process optimisation, industrial engineering, system integration, piping, project management, plant engineering...	+ Thematic Supplement: Energy & Engineering
SEPTEMBER Special Fair: Mocon & M+R Brussels Production systems (ERP, PLM, PDM, MES, RFID...) + Motion Control & Machine building & Engineering + Process technologies & Instrumentation	Deadline 06/09/2011 Post: 27/09/2011	control & measurement, fieldbus & network technology, process & factory automation, DCS, machine building, scada, plc, hmi, PLC, motion control, industrial pc's, Ethernet....	+ Thematic Supplement: Energy & Engineering
DECEMBER Engineering & Logistics (warehousing, RFID,...) + Wireless systems in factory & process automation	Deadline 14/11/2011 Post: 05/12/2011	material handling, AGVs, warehousing equipment & software, pick&place robots, barcodes, RFID, auto-ID + wireless communication,...	+ Thematic Supplement: Energy & Engineering

EDITORIAL SPECIALS 2011 PRINT

5x Energy & Engineering

Energy & Engineering appears 5 per year as a thematic supplement at the heart of the magazine.

This Special draws attention to environmental and energy technology from the point of view of the managing engineer, the person who in many cases has the deciding vote on whether or not to start an environmental or energy project in a plant or factory.

Covered are both green energy and more traditional forms of electricity and energy generation, such as coal, gas and nuclear plants, aside from environmental-technical aspects.

RATES: standard rates Engineeringnet Magazine
 DEADLINES: see media planner on top of page

1x Infotechnique Trendwatch

Once a year, we publish a separate publication called: 'InfoTechnique Trendwatch'. As the title suggests, the special offers an overview of the most interesting technical/technological trends in the fields of engineering, production, maintenance & fluid technology.

This special edition is realized in collaboration with the editorial teams of Engineeringnet.be, Engineeringnet.nl, Maintenance Magazine and Pumps & Process Magazine.

RATES: standard rates Engineeringnet Magazine
 INSERTS: 1 page: 0,21 euro/issue
 2 pages (2xA4): 0,31 euro/issue
 4 pages (4xA4): 0,47 euro/issue
 DATE: 24 January 2011 (appears once a year)
 CIRCULATION: 11.000 issues (CIM controlled)
 DEADLINE: orders: 03 January 2011
